

SATELLITE REGULATION

An introduction for new entrants

Ofcom
making communications work
for everyone

3 November 2017, London

A one day introduction to the regulations you need to know about to get your satellite project off the ground.

Which regulations apply to satellites and why?

Who regulates what?

How to engage with regulators and how they can help you

Step-by-step guidance on what to do when

Topics covered:

- Spectrum licensing for satellite earth stations
- Making a satellite filing to get your satellite's spectrum use internationally recognised
- Licensing your satellite under the Outer Space Act
